Graduation is right around the corner and at the Washington, D.C. JATC, we're graduating 209 apprentices from our 5-year inside electrical and 3-year telecommunications programs.

### Earn while you learn!

**First-year students earn approximately \$51,000** while participating in the tuition-free program and **graduates can make up to \$84,800 a year** plus benefits.

Each year our graduates go right into high-paying jobs in D.C.'s electrical construction and telecommunications industry working on the area's most important projects. They leave the JATC with no student loans to pay off because the program is tuition free—and apprentices get paid while they learn.

Classroom training at JATC.

## Careers continued

The JATC offers these accredited electrical and telecommunications apprenticeship programs in its state-of-the-art facilities in Lanham, MD and Manassas, VA, where the actual systems that power the buildings are used as learning tools. Apprentices attend class in hands-on labs and also rotate through project sites with the D.C. region's best contractors. They learn from instructors who have real-world experience and train on today's most technologically advanced systems.

## Recent projects our apprentices have worked on include:

- **MGM National Harbor Hotel & Casino**
- **National Museum of African American History and Culture**
- **Verizon Center**
- **Georgetown University**
- **I-95 Express Lanes**

Apprenticeship candidates should have strong math and science skills and also enjoy working with their hands instead of at a desk.
